PROFESSIONAL SUMMARY

Computer Science student focused on Software Engineering and AI-powered applications. Experienced in developing full-stack web applications using React, Node.js, Django, and PostgreSQL. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, databases, and software engineering principles. Interested in building scalable backend systems and intelligent applications using modern technologies.

EXPERIENCE

Software Engineer Intern

May 2026 – Jun. 2026

Forlyze (Remote)

- Contributed to Intrvio, an AI-powered interview platform designed to automate candidate screening and assessment workflows.
- Developed frontend features using React and Next.js, improving user workflows for interview creation and candidate evaluation.
- Integrated LLM-powered features to support automated question generation and candidate response analysis.
- Implemented frontend-backend communication through RESTful APIs and collaborated using Git workflows and Agile development practices.

AI Web Development Intern

Jun. 2026 – Jul. 2026

InAmigos Foundation (Remote)

- Improved website usability and accessibility by analyzing UI issues and implementing frontend improvements.
- Researched AI-powered development tools and proposed practical solutions for improving organizational workflows.
- Performed debugging, testing, and frontend optimization tasks in a remote development environment.

EDUCATION

Cairo University

Giza, Egypt

Bachelor of Science in Computer Science

June 2028

- Relevant Coursework: Data Structures & Algorithms, Databases, Object-Oriented Programming, Web Technologies, Software Engineering

PROJECTS

Full-Stack Job Search Platform | *Django, PostgreSQL, JavaScript*

GitHub

- Developed a full-stack recruitment platform connecting employers, applicants, and administrators through a structured web application.
- Designed and implemented REST APIs for authentication, job listings, applications, and user management.
- Implemented secure authentication and role-based authorization for different user types.
- Optimized database interactions using Django ORM and PostgreSQL queries.
- Built responsive user interfaces supporting desktop and mobile experiences.

React E-Commerce Application | *React, TypeScript, REST APIs*

GitHub

- Built a scalable ecommerce application using React and TypeScript with reusable component architecture.
- Integrated REST APIs for product management, cart functionality, and application data handling.
- Implemented responsive UI components and optimized frontend user experience.
- Applied modern frontend development practices including component-based design and state management.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL

Frontend: React, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Django, REST APIs

Databases: PostgreSQL, MongoDB, sqlserver

Tools: Git, GitHub, Postman, Docker
